

Commercial Free radio is a right of the people. I pay for it, who should tell me if I can or can't have it. Sorry for the big radio companies that buy radio stations and then make money by making the listeners listen to commercials all day long. It use to be that commercials were broadcast in between songs played on the radio, now it is songs being broadcast in between commercials played on the radio. Finally, XM radio is here!! Thank God, and thank America. Please reject the NAB's petition 04-160.
